

# Hybrid Cloud With AWS Outposts

What is holding you back from migrating to the cloud? Is it a need for extremely low latency responses? Is it a compliance issue? Whatever the reason, if you have data that must reside on-premises, you can still make use of the cloud, and we can build a hybrid cloud solution that is right for your systems using AWS Outposts.

## Why Choose GlobalXperts?

### Unmatched Performance

Experience the lowest possible latency with AWS Outposts, leveraging cutting-edge infrastructure and network capabilities. Say goodbye to delays and enjoy seamless access to your on-premises systems whenever you need, wherever you need.

### Data Residency

If you have data that is prohibitive to migrate, keep it on-premises and migrate AWS to you. We can design a solution in which your applications can run in Amazon EKS Anywhere on AWS Outposts hardware, where they can access your data directly.

### Rock-Solid Security

Protecting your data is our top priority. Our solutions with AWS Outposts and EKS Anywhere incorporate cutting-edge security, including data encryption, access controls, and compliance certifications. Rest easy knowing your valuable information is shielded against unauthorized access.

### Compliance and Governance

Building an on-premises solution with AWS Outposts can help you to meet industry-leading compliance standards, including HIPAA, GDPR, and PCI DSS. Reduce your legal and reputational risks and rest easy knowing that your data is staying where it needs to be.

### Scalable and Flexible

As your business grows, so does your data. Amazon EKS Anywhere provides scalable container options, enabling you to effortlessly expand your capacity as your requirements evolve. Stay agile and adapt to changing demands with ease.

### Reliability and Resiliency

Trust in the unparalleled reliability of AWS Outposts. The solutions that we build with this platform using Amazon EKS Anywhere are designed to keep your applications safe and give you increased control over your information.

### Expert Support

As a Managed Services Provider, GlobalXperts is dedicated to your success. Our team of certified professionals is available round the clock to address your queries, provide technical assistance, and ensure your Outposts experience is seamless and hassle-free.

### Seamless Integration

AWS Outposts seamlessly integrates with your existing infrastructure and applications. Leverage the power of Amazon EKS Anywhere to streamline your workflows and automate processes, ensuring a smooth transition to the cloud.
